

## SCSI Course Series Zagreb, Croatia

### Courses

#### **Safety Management Systems - Complete (SMS-C)**

29 April - 3 May 2024

Safety Management Systems is the ICAO standard for implementing a systematic approach to managing safety within aviation organizations. This course includes the structures, accountabilities, policies and procedures required to achieve a superior level of aviation safety. SMS-C provides a structured management approach to controlling safety risk in operations, enabling managers and leaders to make informed risk decisions.

#### **Aircraft Accident Investigation (AAI)**

6 - 17 May 2024

SCSI's Aircraft Accident Investigation course provides a comprehensive and holistic approach to aircraft accident investigations in an effective, efficient, and enjoyable manner. Course material covers investigative procedures, requirements, and methodology for both civil and military aviation. The course begins with an overview of investigator expectations/ characteristics then proceeds to preparation, response, analysis, and accident prevention. Students are provided with the most current investigative techniques, delivered by instructors who are active and experienced aircraft accident investigators from civil and military aviation organizations. The instructors bring their techniques, experience and "lessons learned" from the field to the classroom.

#### **Human Factors in Accident Investigation (HFAI)**

20 - 24 May 2024

The Human Factors in Accident Investigation course is a "deep-dive" into the almost-infinite aspects of how and why human error occurs. The course provides attendees with the tools and knowledge to transform this seemingly nebulous subject into a scientific and valid process, producing a complete and comprehensive investigation that examines ALL aspects.
